

# Corrective Action Management

## What Can Xavor's CAPA Management Solution Do For Your Business?

Xavor's Corrective Action and Preventative Action (CAPA) Solution provides consistency, visibility and ease of use across your enterprise.

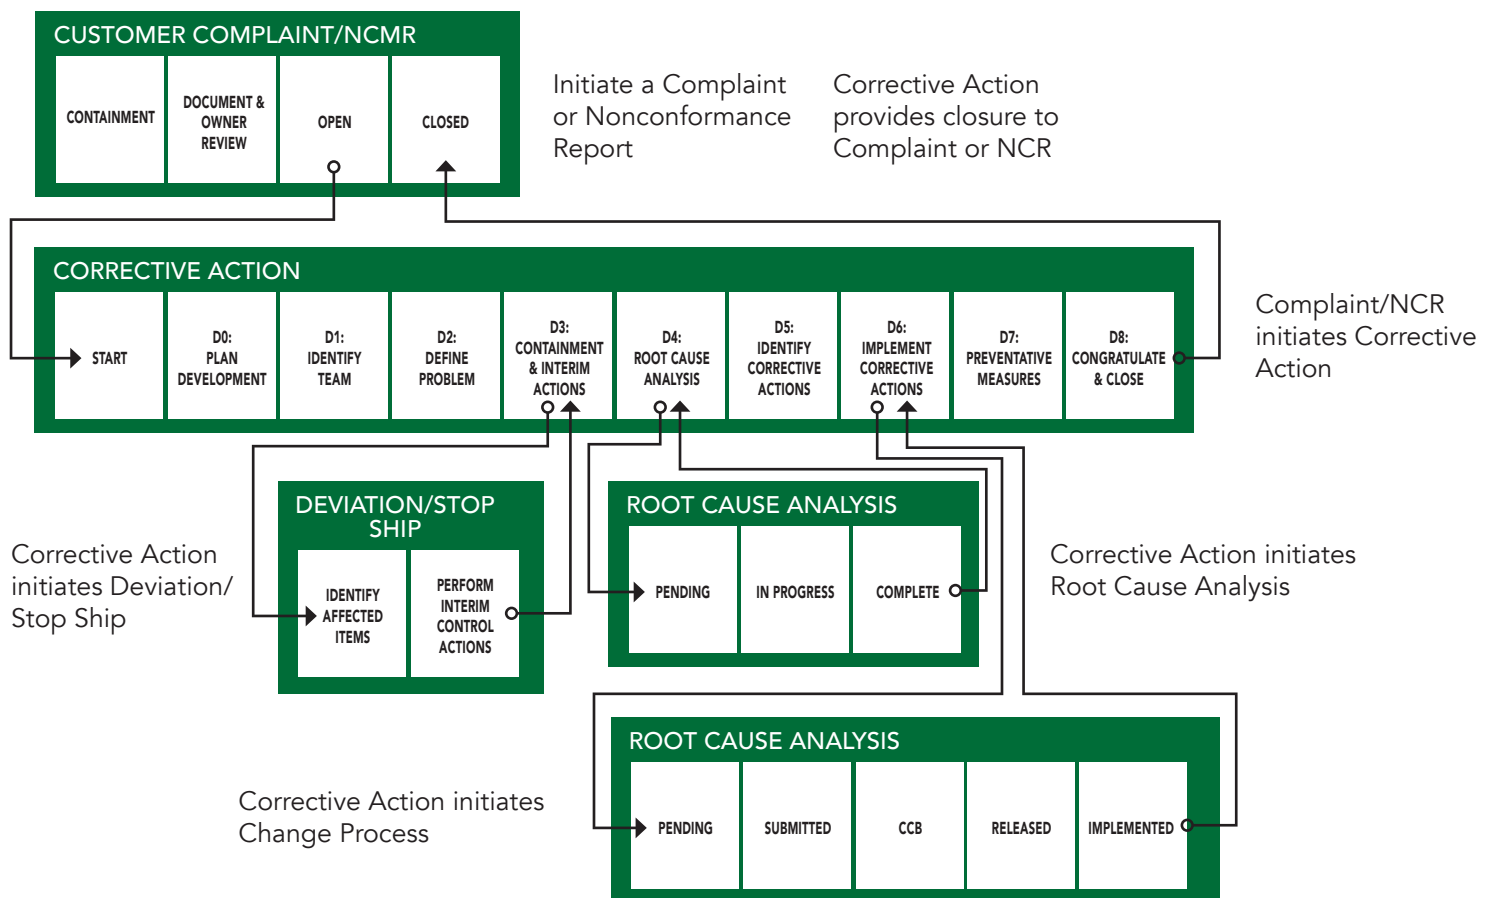

### Why CAPA Management?

Xavor's Corrective Action Management Solution has the ability to take enterprise quality functions (Audit, Corrective Action, SCAR, etc.) turn them into projects and task execution assignments, enabling you to perform more efficiently and collaboratively.

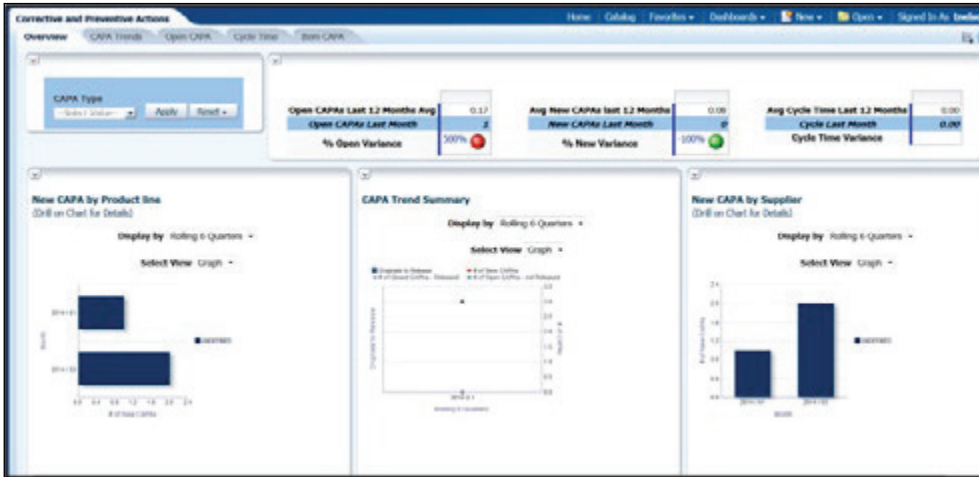

### Quality Issues and Challenges

- Difficult to execute across disconnected systems
- Collaboration
- Significant manual effort is required to include non-documented communications with suppliers, partners and customers into quality processes
- Problem solving takes too long
- Increased likelihood of audit findings with regulatory bodies
- Reporting is extremely challenging

### Closed Loop Corrective Action Process

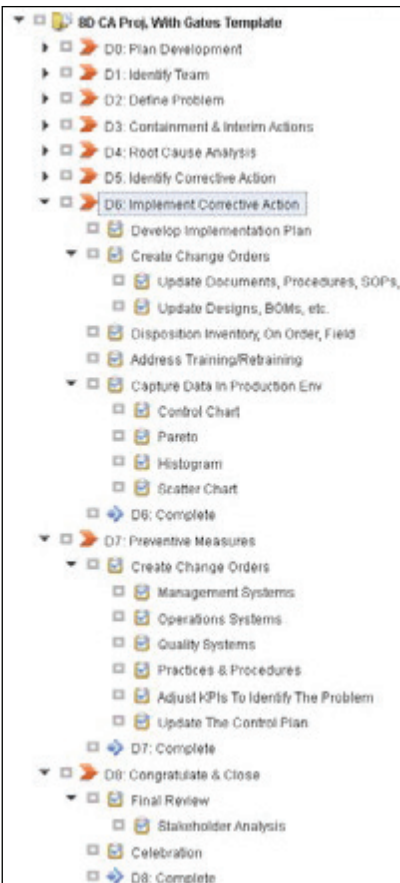

## Key Performance Indicators (KPI's)

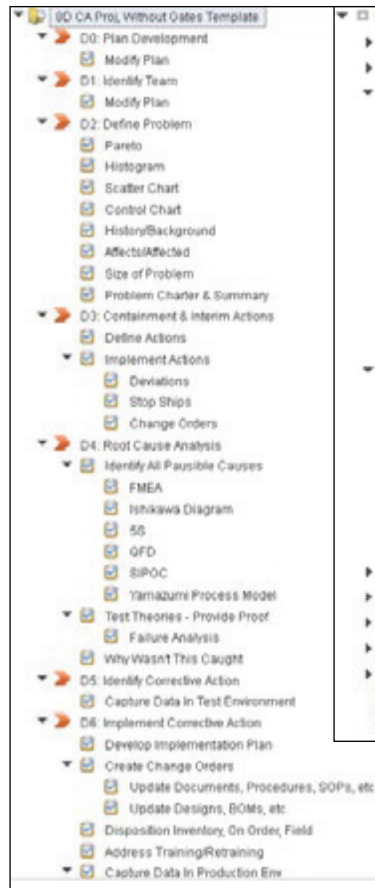

## Key Benefits and Features

- A single automated solution which combines Closed-Loop Corrective Action with Integrated Task Management
- Minimizes training requirements by telling the user what is required rather than going to another document to look it up.
- Reduces the necessity for detailed process documentation
- Automation and use of templates reduces overhead and errors
