

Process Design Services for the Product Value Chain

Xavor's Process Design Services will allow your organization to create lean value add processes while increasing efficiency and control.

Efficiency Goals

- Time to Market
- Cycle Time
- Flexibility
- Collaboration
- Supplier Access
- Fast Decisions

Control Goals

- Product Quality
- Risk/Errors
- Regulation
- KPI Insights
- IP Security
- Accountability

Understanding from Three Points of View

Enterprise View	Business Process View	Activity View
Document high level product development processes under the phase gate model. Create a processes level understanding of product data flow and management with processes leading to release for manufacturing	Understand and interpret individual business process composed of multiple participants for a specific set of related deliverables	Identify each activity or decision in an individual process and recognize value-add of each step and the participants with respective roles

Realized Gains of Process Re-Design

Reduction in Time	Improvement in Operations	Improvement in Quality	Reduction in Costs
<ul style="list-style-type: none"> • Reduce product development cycle time • Agile collaboration with teams and sub-contractors 	<ul style="list-style-type: none"> • Build only approved and correct revisions • Easy and secure sub-contractor access to build information 	<ul style="list-style-type: none"> • Controlled step by step process for data entry • Better change release approval management 	<ul style="list-style-type: none"> • Leaner utilization of R&D through re-use • Reduction of scrap and re-work through efficient and correct channeling of review processes

Process Design Services for the Product Value Chain

Realized Gains of Process Re-Design

- Are your activities customer centered?
- Do they get it done correctly the first time?
- Do you catch waste in the process?
- Do regulations centered activities slow you?
- Can touch points and handoffs be reduced?
- Can information handoffs be reduced?
- How can you reduce defect processing?
- Are there legacy non-value add activities?
- Do the processes leverage best of breed technology solutions?
- Are your processes lean with only necessary people participating?
- Remove process inefficiencies

What We Create

- Enterprise Level process Maps
- Breakout maps for key business processes
- Activity Analysis, Who What, Where, Why, When, How long
- Analysis, decision routing, to upstream or downstream, sequences, step reduction, information visibility, access
- KPI trace in the data
- Value maps, swim lanes, gap analysis fallouts
- Future state of process and implementation plan
