

# Drive Tangible Business Value with Microsoft (Azure) Cloud

## Quickly deploy Microsoft (Azure) Cloud technologies to deliver new application capabilities

### How Xavor approaches Microsoft (Azure) Cloud implementations

- Xavor leverages the power of the Microsoft (Azure) Cloud to make your applications scalable, cost effective and globally available.
- We build and deploy new solutions to the Cloud, migrate legacy systems (to the Cloud) and create hybrid solutions to utilize existing investments.
- Xavor offers implementation services that spans the complete Microsoft Azure cloud Spectrum.

### How can you use Xavor and Microsoft (Azure) Cloud Services right away?

Essential business process can benefit greatly by a migration to (or integration) with the appropriate Azure services as specified below:

#### Marketing, Sales and Customer Success

- Xavor offers deployment and integration with the following MS Dynamics offerings on the Azure
- Microsoft Dynamics CRM Online Enterprise, Microsoft Dynamics Marketing and Microsoft Social Engagement

#### Document Management and Collaborative Workflows

- With over a decade of SharePoint solution experience, Xavor delivers rich workflow and document collaboration experiences.
- Deep integration with Office 365 (for office applications) and OneDrive for cloud based document storage.

#### Mobile Workforce Productivity

- Xavor's Microsoft Azure Mobile Services team specializes in enabling next-gen business workflows on mobile devices.

## Policy Management and Authentication

- Get latest in enterprise policy management and Id/Authentication with Azure Active Directory

## Cloud Data Storage

- Xavor can help implement robust disaster recovery and data backup policies as well as data warehousing using the most appropriate storage Azure Cloud services.

## Business Analytics

- Xavor's BI team has a proven record of delivering analytics solutions using Azure Cloud Services services such as HDInsight (Big data), Machine Learning and Power BI.

## Information Discovery and Retrieval

- Azure Search Service integrates Natural Language Processing (NLP) and raking customization to your enterprise data search.
- Search easily across heterogeneous data sources.

## Legacy Enterprise Systems and B2B Integration

Xavor can help maximize ROI on existing IT investments by integrating Microsoft Azure Cloud solutions with legacy systems (both On-Premise & Cloud based). This affords incredible flexibility in the timing and extent of the migration from On-premise systems to the cloud.
