Agile PLM — Upgrade Services

xavor

What Can Xavor's Agile PLM Upgrade Services Do For Your Business?

Here are some ways in which our Agile PLM Upgrade Services are different:

- ✅ We include not only delta training but we also include business workshops on how your company can use new features and configuration in both of your test and production environments.

- ✅ We automatically include load/performance testing against the benchmark of your existing environment to avoid performance degradation by an upgrade.

- ✅ We upgrade all of your customizations.

- ✅ If you lost your source code, we can decompile it to ensure that the right version gets moved.

- ✅ We have the best relationships with CAD providers and will work to ensure that the new Agile PLM version works with CAD environments.

- ✅ If you are using Oracle PIP, we are aware of versions that work with each other throughout the stack. We can upgrade it with you as one project *(additional charges apply)*.

- ✅ OPLA upgrades are included in all our packages even if you have page 3 or custom attributes configured.

- ✅ If we complete your upgrade, all of your awesome Xavor add-ons get upgraded as well, even if you didn't buy support for the add-on solutions. *This happens only if we are doing the upgrade.*

- ✅ If you give us a Hosting contract, we will upgrade it for you at no cost.

- ✅ If you give us a Managed Services contract, we will upgrade it for you at no additional cost.

- ✅ If we are completing the upgrade and you buy our xEngine Integration solution, we will waive the implementation services cost.
