

# BizTalk Advisory Services

## What Can Xavor's BizTalk Advisory Services Do For Your Business?

No Two **BizTalk** implementations are the same, and your in-house IT team will need support and training in order to make an informed decision as to what kind of **BizTalk** project is the most suitable for your organization.

**BizTalk** is a powerful integration and business process automation tool, and can be used to complete a wide variety of integration projects.

### Some include:

- ERP Integration – SAP, AX, PeopleSoft, Oracle EBS, JDEdwards, BPCS, and JBA
- EDI – Hundreds of x12 and Edifact EDI documents including 850, 855, 865, 810...
- Healthcare Solutions – HIPPA and HL7, including 837, 835, 834, and 270 series inquiry documents
- B2B Protocols – AS2, RosettaNet, SWIFT, OAGIS, and other industry standards
- Database Integration – SQL Server, Oracle DB, DB2
- Web Service Integration – including SOAP/WS-\*, REST, WCF, and POX services in heavily secured environments
- Custom Application Integration – integrations with custom applications across a variety of platforms including .Net, Java, COBOL, C, ColdFusion

**Xavor's BizTalk Advisory Services** will help your IT team decide which **BizTalk** projects are a good fit for you, and what sort of architecture will integrate your disparate systems, heterogeneous data, and trading partners in the most robust manner.

## Why Xavor?

Over the years, **Xavor** has developed a comprehensive engagement roadmap that consists of the following modules:

- **Initial Assessment and Analysis:** Our team of experts will work with you to understand your organizational strategy and concerned business processes. We will also do a thorough assessment of your enterprise-level IT systems and infrastructure, and then give detailed recommendations as to which type of BizTalk implementation would be most suitable for your unique needs.
- **Integration Strategy and Implementation Roadmap:** We will formulate a comprehensive **BizTalk** integration strategy for you and we will help guide you through your architectural decisions and implementation plan. Additionally, we will inform you if any system upgrades or procurements are required in order for you to proceed with your desired **BizTalk** implementation.
- **Training:** Our experts will provide hands on training to your internal IT team on the latest features of **BizTalk**, industry best practices for **BizTalk** implementation and maintenance, and architectural principles. The training portion can be purchased as part of the overall consultancy roadmap or as a standalone engagement.
