

BizTalk Implementation

How Can Xavor Help You With Your BizTalk Implementation?

Xavor's Microsoft BizTalk Server offerings are highly suitable for complex IT landscapes that demand:

- Enterprise Application Integration (EAI)
- Business Process Management (BPM)
- Business-to-Business integration (B2B)
- Service Oriented Architecture (SOA) and Enterprise Service Bus (ESB)
- High Availability and Scalability

Microsoft BizTalk Server has been endorsed by Gartner as one of the “Leaders” in the Enterprise Integration space. Per Microsoft, the Integration Solution has been installed by over 12,000 customers, including 81% of the Fortune Global 100, who are using BizTalk Server to facilitate payment processing, supply chain management, business-to-business EDI, real-time decision making, and reporting.

BizTalk Server is not an investment in a new software, rather it maximizes the ROI of your current IT investments by increasing your business efficiency and reducing turnaround time.

Why Xavor ?

Xavor has been implementing BizTalk Solutions since 2004. Our experienced consultants ensure that not only is your implementation experience smooth and seamless, but also you get the maximum benefits from your implementation whether its:

- Electronic Data Interchange (EDI)
- Integration of disparate systems and heterogonous data to increase business efficiency
- Service Oriented Architecture (SOA)
- Transaction and business process modeling
- Custom development
- Deployment & configuration
