

# BizTalk Upgrade

## What Can Xavor's BizTalk Upgrade Offering Do For Your Business?

### Engage Xavor's team of expert to upgrade to Microsoft BizTalk Server 2016 and enjoy:

- Enhanced security and auditing features
- Heightened productivity tools
- High availability of production workloads in Azure
- Simplified connectivity of on-premises systems to cloud-based applications, and seamless integration with SaaS (i.e. Salesforce, Dynamics, SAP cloud, and Oracle Cloud)

### Microsoft is phasing out the support for earlier versions of BizTalk

BizTalk Version	Support End (Mainstream)	Support End (Extended)
BizTalk Server 2006	7/12/2011	7/12/2016
BizTalk Server 2006 R2	7/12/2011	7/12/2016
BizTalk Server 2009	7/08/2014	7/09/2019
BizTalk Server 2010	1/12/2016	1/12/2021
BizTalk Server 2013	7/10/2018	7/11/2023
BizTalk Server 2013 R2	7/10/2018	7/11/2023

### We do not recommend opting for extended support due to the following reasons:

- Non-Security hotfix support will require extended hotfix agreement, purchased within 90 days of mainstream support ending
- Incident support shall be chargeable
- Warranty claims cannot be made
- Design changes and feature requests cannot be made

## Why Xavor?

Xavor's **BizTalk** team has performed dozens of **BizTalk** upgrades over the years. We have developed a set of repeatable frameworks, or accelerators, that allow us to upgrade your **BizTalk Server** in no time.

Before the upgrade, we will perform the following activities to create your very own implementation and deployment roadmap:

- **Evaluation of Enterprise-level Strategy:** We start by analyzing the specific needs of your organization to determine whether you should opt for an on-premises, cloud, or hybrid solution.
- **Existing IT Systems Evaluation:** We evaluate your existing systems and hardware to determine whether a direct upgrade is possible. If not, we will recommend the additional software/hardware that needs to be procured based on your organizational requirements.
- **Implementation:** Based on the findings of the initial two steps above, we will create a custom implementation and deployment plan to upgrade your **BizTalk** server and migrate your existing systems to the new version in a seamless manner.

# BizTalk Upgrade

## Upgrade and Support BizTalk the Easy Way

To help companies seamlessly upgrade and maintain **BizTalk Server**, we offer clients the option to purchase our bundled upgrade and managed services offerings. With a one-year service agreement we will upgrade your environment for free.

### Key Features:

- Install and configure **BizTalk Server 2016**
- Build infrastructure for 3 environments:
  - Dev – 1 application server, 1 database server
  - QA- 2 application servers, 1-2 database servers
  - Production – 2 application servers, 1-2 database servers
- Outline an adoption and deployment strategy
- Migrate existing solutions to the upgraded server
- Train internal resources on industry best practices
- Build/enhance existing artifacts
- Provide ongoing technical support

*Customers must purchase at least 80 hours per month to be eligible for the free upgrade. The purchased hours can also be used for any of the following activities:*

- **BizTalk** planning
- Bug fixing/enhancements
- Support
- Training

*We will work closely with your organization's internal IT experts to ensure that your **BizTalk Server** implementation is designed, developed and monitored in the best way possible. Please note that the installation of the base software is the customer's responsibility.*
