

# Xavor Enterprise Cloud Offering

## Xavor maximizes ROI on your Enterprise apps by leveraging the power of the Cloud

### PLM Cloud Services

Xavor's next-gen Cloud PLM Product Structuring Services enables companies to reduce time by enabling common data and business processes across the enterprise.

- Minimize problems sharing accurate, consistent and common data throughout the enterprise
- Bring together data from disparate groups or new business mergers & acquisitions by transforming and assimilating data
- Improve product analysis and reporting

### Microsoft Cloud (Azure) Services

Xavor leverages the power of the Microsoft (Azure) Cloud to make your enterprise applications globally available, scalable and cost effective.

- Use the Azure IaaS (Infrastructure as a service), PaaS (platform as a service) or SaaS (Software as a Service) offerings to provide the solution that best fits your needs.
- A complete Microsoft enterprise applications offering for the cloud including CRM, ERPs, CMS, Storage, directory services etc.

### Amazon AWS Cloud Services

With Xavor's deep knowledge and expertise, we are uniquely placed to take your enterprise applications to the Amazon cloud, the largest and most popular cloud offering.

---

## Cloud Scenarios all enterprises should be considering

- Migrate your existing on-premise systems to the cloud
- Modernize and extend custom legacy apps for the cloud.
- Enable new workflows and streamline existing ones with cloud based mobile apps.
- Extend your on-premises infrastructure into the cloud.
- Build a private cloud due to governance to technical compulsions.
- Leverage hybrid cloud solutions to enable your enterprise's gradual move to the cloud.
- Enable data aggregation, mining and analytics across existing on premise legacy systems such as ERPs, CRMs and PLMs.
- Build new cloud based workflows and reporting scenarios on top of Legacy systems (both on-premise and cloud).
