

## What Can Xavor's xReport Do For Your Business?

**Xavor's xReport - Agile PLM Data Reporting** generates considerably complex reports without writing any code. The Admin Portal allows you to configure reports using data which is sourced through Agile Searches and other data sources. Users can later generate those reports.

### Why xReport?

**xReport** eliminates the need to write code to develop custom reports for Agile PLM customers. Creating reports from scratch can require substantial custom development. With **Xavor's xReport**, users have the ability to extend, combine, manipulate and aggregate Agile Data from multiple searches.

### The Flow Process:

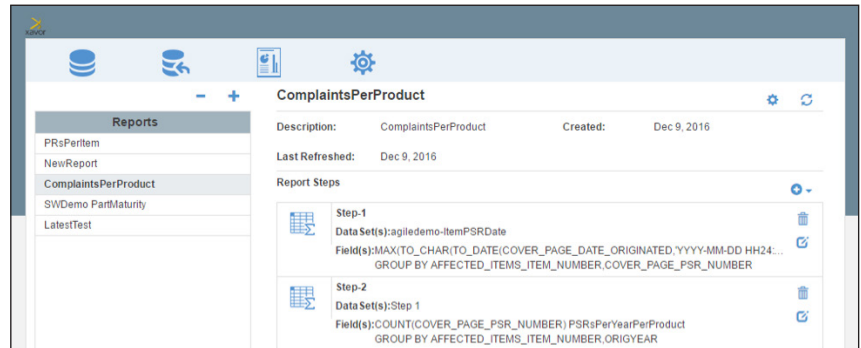

# xReport - Agile PLM Data Reporting

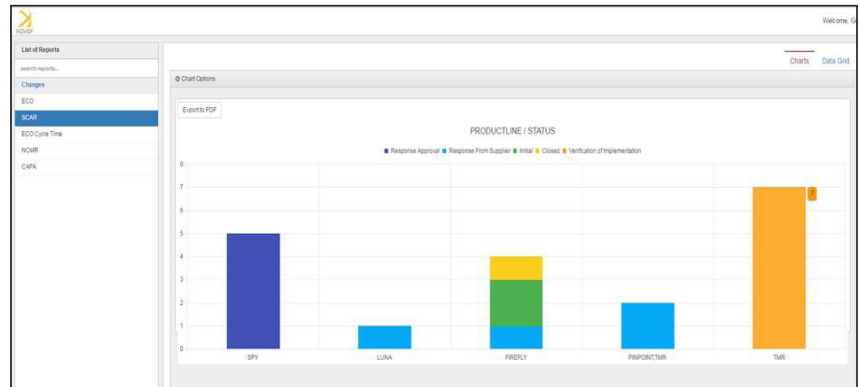

## Components:

- **Data Source:** Defines where to extract data from (Agile Search or DB)
- **Data Set:** Tabular data extracted from a data source
- **Report Step:** A sub-part of the Report which defines operations based on multiple DataSets. Generates partial output which is usable in other Report Steps
- **Report:** Sequence of Report Steps that will give the desired output data

## Report Output:
